

Coatesville VA Medical Center  
Lot G Parking Changes  
Effective November 24, 2014

The half of Lot G closest to buildings 57 and 58 will be reserved for patient parking beginning Monday, November 24, and will include handicapped spaces. Patients must display a current valid handicap plate or placard. No employees are permitted to park on this half of the lot.

The half of Lot G closest to buildings 38 and 39 will remain available for employee parking unless spaces are reserved for training events. Reserved spaces require a valid ESD parking permit to be displayed on the dash and are good only for the day(s) of the event.

It is more likely than not with the downsizing of the number of spaces available for employee parking that Lot G will be closed for employee parking for certain large training events. As always, staff will be notified of Lot G parking restrictions through the Weekly Bulletin, email announcements for lot closures and by the electronic sign at the Lot G entrance.

Motorcycle designated parking spaces in Lot G will not be impacted by the planned changes.
